Profile

Master's student in Finance (ESSCA Grande École) seeking a 6-month Financial Analysis internship starting January or March 2027. Built two automated trading systems (Python, TypeScript) covering signal research, execution modeling and live P&L tracking, with coursework in derivatives pricing, stochastic calculus and fixed income with AI. Currently Wealth Management Assistant at L&A Finance; independent reseller from 2018 to 2025 with ~50% net margin.

Education

ESSCA School of Management — **Paris, France**
Master 1 in Financial, Accounting and Management Control — *Sept 2025 - May 2026*

- Empirical methods in Finance, Stochastic Calculus, Derivative Pricing (Black Scholes), Fixed Income Modeling, IFRS Standards, Quantitative Risk Management, Financial Engineering and Portfolio Management

Accepted for an MSc in Finance & Data Analytics — *Sept 2027 - Dec 2028 (Expected)*

- Python Programming, Data Science, Machine Learning, Financial Markets and Modeling, Risk Management, ESG Investments, Fintech, Merger & Acquisition, Private Equity and Investment Banking

Ritsumeikan Asia Pacific University — **Beppu, Japan**
Semester Exchange Program — *Apr 2025 - Jul 2025*

College/Lycee Institut Notre-Dame — **Saint-Germain en Laye, France**
General Baccalaureate specialized in Mathematics and Economics - **GPA: 4.0** — *Sept 2019 - Jul 2022*

Certifications

Bloomberg Market Concepts — *Jan 2026*
TOEIC - 975/990 — *Dec 2025*
Autorité des marchés Financiers (AMF) — *Expected Dec 2026*

Professional Experience

L&A Finance — **Paris, France**
Wealth Management Assistant — *Sept 2026 - Feb 2027*

- Processed and controlled client transactions across investment products (life insurance, SCPI, securities accounts), coordinating with Middle and Back Office teams for post-trade compliance checks
- Monitored markets and drafted weekly market updates and technical notes used by advisors in client meetings

Mecanicus — **Paris, France**
Sales Assistant Intern — *May 2024 - Jul 2024*

- Contributed to 10+ high-value sales between €50,000 and €500,000 through strong client relationships and attention to detail
- Managed luxury car inventory worth over €3,000,000 and related logistics

Independent Reseller Luxury & Limited-Edition Goods — **Paris, France**
Self-employed — *Jan 2018 - Sept 2025*

- Purchased and sold luxury and limited-edition products and clothing
- Generated €10,000+ in revenues and €5,000 in profit by identifying market opportunities and optimizing resale pricing

Research Projects

Crisis Driven Algorithmic Trading Strategy — *Jan 2026 - Jun 2026*
Developed an automated system to capitalize on market crises and panic-driven mispricings during economic downturns

- Implemented realistic execution constraints: transaction costs (15 bps), liquidity limits (20% ADV), and position sizing based on crisis severity indicators
- Backtested over 10 years (2016-2026) capturing major crashes including COVID-19, achieving a 0.91 information ratio vs SPY by exploiting mean-reversion during panic sell-offs
- Deployed dual-broker architecture with real-time crisis detection, automated entry/exit triggers, and risk monitoring via SQLite database

Polymarket BTC Short-Term Trading System — *Mar 2026 - Jul 2026*
Developed and ran a live automated trading system on short-term BTC binary markets using real-time multi-exchange order flow

- Built in TypeScript/Node.js, aggregating real-time order flow from 8 exchanges (Binance, Coinbase, Kraken, OKX…) into a directional trading signal
- Maintained a real-time L2 order book and executed signed orders with live fill tracking and on-chain settlement; deployed on AWS with monitoring and a live P&L dashboard
- Tested dozens of strategy variants (order-flow, hedging, scalping, LLM-based news filter) and reconciled daily P&L against on-chain wallet snapshots
- Quantified the paper-vs-live performance gap (+$208/day paper vs −$130/day live) driven by slippage, partial fills and fees (break-even at ~82% win rate); concluded no durable net edge and shut the strategy down

Summary of skills

Programming: Claude Code in Python (pandas, NumPy), TypeScript/Node.js, SQL, VBA
Finance Tools: Bloomberg Terminal, Refinitiv Workspace, Microsoft Office (advanced Excel)
Others: Git, REST/WebSocket APIs, AWS, LLM integration, AI-assisted development (Claude Code)
Languages: English (Full professional proficiency, C1), French (Native, C2), Spanish (B2)
Interests: Travel, Skiing, Football (soccer), Sudoku

Dear Hiring Team,

I am writing to apply for the six month Analyst internship in the M&A Large Cap department of Crédit Agricole CIB in Montrouge. Taking part in the origination and execution of sell side and buy side mandates for large corporates, within a team that gives interns real responsibility on financial valuation, company modelling and marketing documents, is exactly the kind of apprenticeship I want to begin my career in investment banking.

I am currently completing a six month internship as Wealth Management Intern at L&A Finance in Paris, an independent wealth management advisory firm within the Groupe Rayne, where I analyse and structure financial transactions across various investment products, conduct daily market monitoring and contribute to the preparation of technical client materials.

My Master's 1 in Finance at ESSCA and my Bloomberg Market Concepts certification have given me solid foundations in corporate finance, valuation and financial modelling. Using AI tools, I designed a quantitative equity strategy that achieved a Sharpe ratio of 0.91 against the SPY over a ten year backtest, and I built a live trading system connected to eight exchanges with real time P&L monitoring, which I shut down once the data showed no net edge. These projects taught me to structure an analysis, test assumptions rigorously and turn large amounts of information into clear conclusions, skills I would bring to sector and company presentations, desk research and the preparation of pitch materials.

My commercial track record taught me how deals are negotiated and closed. At Mecanicus, I completed more than ten over the counter transactions between €50k and €500k and helped manage €3M of inventory. As an independent reseller since 2018, I generated over €10k of revenue with a net margin of around 50%. I am fluent in English (TOEIC 975/990) and French, and I also speak Spanish, which helps me work comfortably in an international environment.

I am available for six months from July 2027.

I would be delighted to join the M&A Large Cap team of Crédit Agricole CIB and would welcome the opportunity of an interview.

Yours sincerely,

Gonzague GROS-DUBOIS
